Profile

Agile and results-driven full-stack developer with a strong focus on performance optimization, user experience (UX), and business impact. Quick learner who enjoys adopting new technologies and collaborating in teams. Passionate about writing clean, efficient, and accessible code that supports company growth.

Professional Experience

Full-Stack Software Developer

Ridesolutions Oy, Lahti

(01/2026 – present)

- Resolved Google Play's 16 KB page size compliance requirement for a legacy Android app (Android 15+ compatibility). Analyzed native libraries (.so files) using APK Analyzer, identified 4 KB alignment issues, restricted ABIs (armeabi-v7a & arm64-v8a), enabled legacy packaging mode, and ensured functionality without recompiling native code from old .aar packages.
- Fixed a recurring issue where hundreds of foreign fake accounts were created weekly. Resolved it by switching the domain's nameservers to Cloudflare. Added Cloudflare security rules, including geo-restrictions to Finland only and blocking of aggressive crawlers. This eliminated a large volume of unwanted traffic to the app and website.
- Develop and maintain Android application using Kotlin; update dependencies and modernize legacy Java code for compatibility. Optimizations improved app startup time from ~1200 ms to ~600 ms.

Full-Stack Software Developer

ARKHALTIA Oy (Architecture firm), Kouvola

(01/2024 – 12/2024)

- Optimized WordPress website performance, reducing load time from 5 seconds to 1 second (PageSpeed Insights / GTmetrix).
- Improved SEO, achieving top search rankings for three key terms and increasing organic traffic by ~40%.
- Developed responsive and intuitive user interfaces using Elementor; received positive feedback from management and enhanced client satisfaction.

Freelance / Personal Projects Developer

Various assignments

(01/2025 – 12/2025)

- Developed personal projects and maintained technical skills (e.g., Python-based machine learning models, 3D web applications).
- Contributed to open-source development and self-studied new technologies.

Website Developer (Wix)

Lauran Jalkahoitola

(11/2023 – 12/2023)

- Designed and implemented a responsive website on the Wix platform, increasing new customer inquiries by ~30% within three months.
- Optimized load speed from 1000 ms to 300 ms (image compression, code minification, caching).
- Iterated development based on client feedback to ensure alignment with the client's vision.

Freelance Website Developer

Jalkahoitola Askel

(05/2023 – 07/2023)

- Redesigned navigation and visual appearance, improving usability and brand experience.
- Enhanced online visibility and customer experience.

Projects

- **3D-Portfolio** – Interactive web portfolio built with Three.js (JavaScript).
- **Face Recognition & Tracking** – Python-based face recognition and tracking system.
- **Neural Network** – Personal neural network implementation in Python.

Technical Skills

- **Programming Languages:** JavaScript/TypeScript, Node.js, C#, Java, Python, PHP, Kotlin
- **Front-end:** React, Angular, HTML5, CSS3, Tailwind CSS, EJS
- **Back-end & Databases:** Express, MySQL, MongoDB, Axios, Cheerio (web scraping), AWS (RDS, EC2)
- **Tools & Platforms:** Git/GitHub, WordPress, Elementor, Wix, Gradle, Android Studio
- **Other:** Agile/Kanban, SEO, performance optimization, responsive design

Education

Bachelor of Business Administration (BBA), Business Information Technology

LAB University of Applied Sciences

(08/2021 – 11/2024)

- Studies focused on full-stack development: web development, software architecture, server-side programming, databases, game design, teamwork, and leadership skills.
